The systematic path to the optimal handling solution Whether for palletizing, press transfer, or high-speed pick and place, entire production lines can be implemented on the basis of SIMATIC and SIMOTION. Our scalable offering of handling solutions from the Digital Enterprise portfolio meets a wide variety of automation requirements. Handling solutions for all applications | Machinery and ... With many years of experience in the design of drives for a wide variety of handling machines, KEBA is the right drive technology partner in this segment. We offer you a wide range of servo motors and gears as well as solution competence in the field of torque and linear motors. Your benefits. Decades of experience in drive design KEBA | Custom drive solutions for mechanical engineering SmartVision is Brock Solutions' Human-Machine Interface (HMI). By providing a live graphical representation of the Baggage Handling System (BHS), SmartVision allows control room operators to monitor the BHS in real-time, enabling areas of congestion or mechanical issues to be identified before they have a chance to negatively impact system ... Machine Design Problems and Solutions - StemEZ.com The graphical representation of the problem is given below and from that we have that the solution lies at the intersection of  $(x C /4) + x T = 4$  and  $6x$

$T + 3x C = 40$  Solving these two equations simultaneously we get  $x C = 10.667$ ,  $x T = 1.333$  and the corresponding profit = £146.667
